

Fiscal Year 2019-2020

Syringe Services Report

Fiscal Year : 7/1/2019—>06/30/2020

Table 1. Basic Syringe Service Program metrics

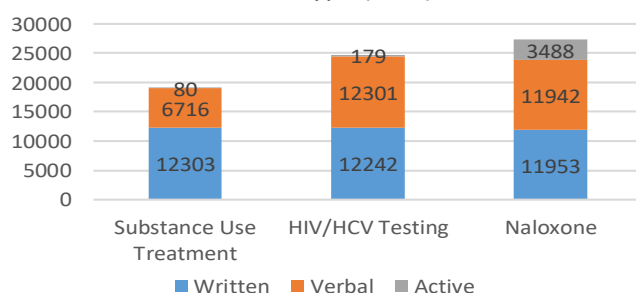

Metric	Year
	N
Syringes In	583,473
Syringes Disposed Elsewhere*	4,330
Syringes Out	661,429
Return Ratio**	1.13
Return Ratio (with disposed)	1.13
Total Unique Clients Served	2,287
Total Encounters	13,331
New Participants	1,440

Syringe service providers (SSPs) operating in Utah are required by law to report this information. Currently, six SSPs operate in the state of Utah: The Utah Harm Reduction Coalition, One Voice Recovery, the Utah AIDS Foundation, Utah Naloxone, Soap 2 Hope, and South East Utah Health Department.

*Self reported proper disposal

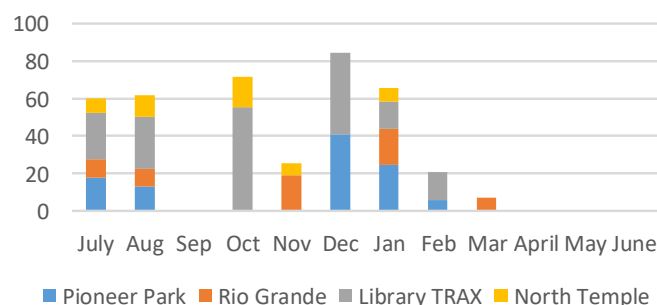

**"Return Ratio" is Syringes Out divided by Syringes In.

Figure 1. Required referrals provided by referral type (Year)

Substance Use Treatment, HIV/HCV Testing, and Overdose Prevention/Naloxone referrals are required at each encounter for all providers. The figures show number of written, verbal, and active ("warm hand off") referrals for each service.

Figure 2. Pounds of sharps collected from disposal kiosks by location

Data was not collected for September 2019, nor April, May, or June 2020.

*1 pound=approximately 110 syringes.

See page 3 for detailed table.

Table 2. Naloxone provided by SSPs

Naloxone	YTD
Doses Distributed	823
Reversals Reported	38

Reversals are defined as survival of an individual when one or more naloxone doses were administered to person in a suspected overdose event.

Additional naloxone purchased by Utah Naloxone and distributed by syringe service providers is not included in these numbers.

Figure 3. Clients served by gender (Year)

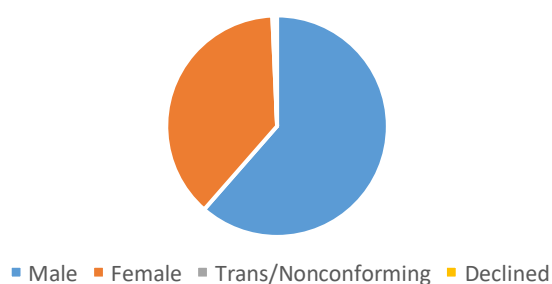

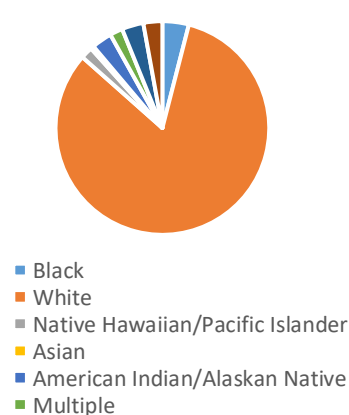

Figure 4. Clients served by race (Year)

(See table 5 on page 3 for detailed breakdown of race and gender)

Figure 5. Number of new clients by substances used (Year)

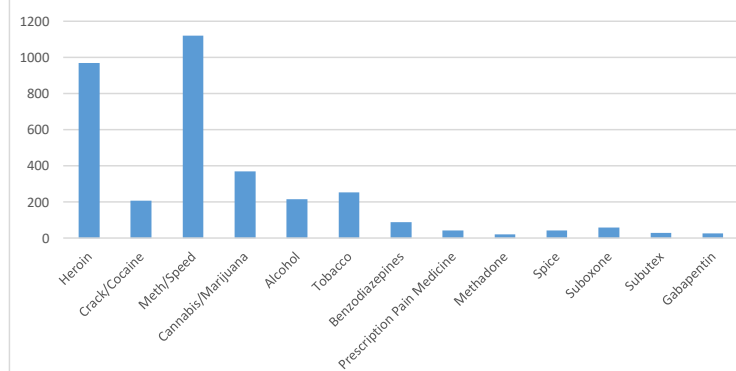

Table 3. HCV/HIV testing and identification.

HCV Testing*	YTD
Reported HCV positive at intake	231
Tested	247
Tested Positive	64
Positivity Rate	25.9%
HIV Testing*	YTD
Reported HIV positive at intake	21
Tested	293
Tested Positive	2
Positivity Rate	0.7%

*All tests are rapid antibody tests

Clients are asked upon intake to report all substances used in past 30 days (see table 3 on page 3)

Supplemental Tables

Table 4. Number of new clients reporting specific substances in past 90 days at intake.

Substance	Year
Heroin	968
Crack/Cocaine	208
Meth/Speed	1119
Cannabis/Marijuana	370
Alcohol	215
Tobacco	252
Benzodiazepines	88
Prescription Pain Medicine	43
Methadone	21
Spice	43
Suboxone	58
Subutex	28
Gabapentin	26

Table 5. Unique clients served by race. Year.

Race	Year (%)	Year (N)
Black	4.0%	99
White	82.5%	2042
Native Hawaiian/Pacific Islander	1.8%	45
Asian	0.5%	12
American Indian/Alaskan Native	3.1%	76
Multiple	1.9%	48
Declined/Unknown	3.3%	81
Other	2.9%	71

Table 6. Unique clients served by sex. Year.

Gender	Year (%)	Year (N)
Male	61.4%	1520
Female	37.9%	937
Trans/Nonconforming	0.4%	10
Declined	0.3%	7

Table 7. Pounds of sharps collected at Kiosks by month and location.

Location	July	Aug	Sep	Oct	Nov	Dec	Jan	Feb	Mar	April	May	June	Year
Pioneer Park	17.8	13	0	0	0	40.8	24.6	5.8	0	0	0	0	102
Rio Grande	9.8	9.3	0	0	19	0	19.3	0	6.9	0	0	0	64.3
Library TRAX	24.7	27.8	0	55.3	0	43.7	14.3	14.8	0	0	0	0	180.6
North Temple	7.8	11.5	0	16.3	6.3	0	7.3	0	0	0	0	0	49.2
Total Pounds	42.3	61.6	0	71.6	25.3	84.5	65.5	20.6	6.9	0	0	0	396.1

(1 pound==Approximately 110 syringes)
